

### OVERVIEW

The E526 is a premium 11.5" 5.56 NATO compact combat pistol manufactured to the highest standards in the industry. Built around a hybrid-profile spiral fluted chrome-lined barrel, carbine-length gas system, and premium Shadow Systems components throughout, it delivers exceptional reliability, durability, and maneuverability in a compact package.

MAELSTROM PLAN B FLASH HIDER

### SPECIFICATIONS

| Weight               | 5.4 lbs                                                                                                                                                                    |
| Barrel Length        | 11.5"                                                                                                                                                                      |
| Barrel Specification | 4150 CMV Steel, Hybrid Profile, Spiral Fluted, Chrome-Lined. Stress relieved before and after machining to maximize accuracy and minimize heat dispersion. 1:7 Twist Rate. |
| Gas System           | Carbine Length                                                                                                                                                             |
| Gas Block            | Cross-Pinned 17-4 Stainless Steel                                                                                                                                          |
| Muzzle Device        | Maelstrom Flash Hider, Plan B Compatible                                                                                                                                   |
| Handguard            | Lightweight Low-Flex M-LOK Handguard with high-strength, low-profile, multi-axis mounting system and extended barrel nut.                                                  |
| Bolt Carrier Group   | C158 Bolt, MPI Tested, premium low-friction surface engineering. Available in TiCN (Bronze) or ArmorLube (Black).                                                          |
| Bolt Release         | Ambidextrous                                                                                                                                                               |
| Safety Selector      | Ambidextrous, configurable for lever style and 60° or 90° throw.                                                                                                           |
| Trigger              | Elite Two-Stage Duty Trigger (3.5 lb total pull)                                                                                                                           |
| Charging Handle      | Ambidextrous                                                                                                                                                               |
| Furniture            | Proprietary Shadow Systems textured pistol grip                                                                                                                            |
| Sling Mounting       | Sling attachment points in brace. User-configurable angled M-LOK sling mount on handguard.                                                                                 |
| Brace                | Shadow Systems Proprietary Stabilizing Brace                                                                                                                               |
| Finish Options       | Black / FDE Anodized                                                                                                                                                       |
| MAP Price            | \$2,179                                                                                                                                                                    |

### INCLUDED IN BOX

- E526 Rifle
- Rifle Bag
- 2x 30-round magazine
- Owner's Manual
- Chamber Flag
- Cable Lock
- Configurable Selector Lever Kit

### AVAILABLE COLORS

Additional configurations available.
