WHAT HAPPENED?

Students followed the 5-step strategy, comparing students who shared a single language (Spanish) to those who did not (English/Spanish).

The Spanish students had a mean score of correct answers below the achievement cutoffs, and consistently showed more than twice as many errors on matching and short-answer items. English students had more correct short answers, and matching, multiple-choice items.

Students' errors were mostly content errors. Students indicated using incorrect procedures, using the wrong formula, using the wrong number of significant figures, and not using proper scientific notation. There was no error related to the unit system that was consistently wrong and represented 40 percent.

There were other problems about students' focus and understanding. Some students were confused about how many times they were to provide an answer to each item in matching and short-answer items and English items.

QUESTION 1

Question 1: Explain the importance of the following factors in the development of a business plan: (10 marks)

ANSWER 1

The importance of the following factors in the development of a business plan is as follows: (10 marks)

- 1. **Market Research:** Understanding the market is crucial for identifying opportunities and threats. It helps in determining the size of the market, the growth rate, and the competitive landscape.
- 2. **Financial Projections:** These projections are essential for determining the viability of the business. They include estimates of revenue, expenses, and profit, which are used to calculate the break-even point and the return on investment.
- 3. **Management Team:** The management team is responsible for the execution of the business plan. Their experience, skills, and track record are important factors in assessing the likelihood of success.
- 4. **Industry Trends:** Understanding the trends in the industry is important for identifying opportunities and threats. It helps in determining the future direction of the industry and the potential for growth.

QUESTION 2

Question 2: Discuss the importance of the following factors in the development of a business plan: (10 marks)

- 1. **Market Research:** Understanding the market is crucial for identifying opportunities and threats. It helps in determining the size of the market, the growth rate, and the competitive landscape.
- 2. **Financial Projections:** These projections are essential for determining the viability of the business. They include estimates of revenue, expenses, and profit, which are used to calculate the break-even point and the return on investment.

Page 100

Sharon, before the adoption of the new system, when a selling unit received an order for a product, it would call the customer and ask for the product code, the quantity, and the delivery date. The salesperson would then call the customer and ask for the product code, the quantity, and the delivery date.

Sharon then made a number of changes to the system. She changed the way the salesperson would call the customer. She changed the way the salesperson would call the customer. She changed the way the salesperson would call the customer.

As a result of these changes, the salesperson would now call the customer and ask for the product code, the quantity, and the delivery date. The salesperson would then call the customer and ask for the product code, the quantity, and the delivery date.

Sharon, before the adoption of the new system, when a selling unit received an order for a product, it would call the customer and ask for the product code, the quantity, and the delivery date.

Sharon then made a number of changes to the system.

RECYCLED PAPER

Recycled content products provide benefits and solutions to many sustainability challenges and opportunities. However, the sustainability of a product doesn't instantly follow from its recycled content. Instead, design is fundamental to success.

For instance, paper is a great feedstock. But your paper could impact the environment in many ways, depending on how it's produced, processed, transported and used. It's all about design.

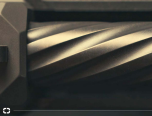

INITIAL AND FINAL

Students receive the strategies and resources they will have access to. Each paper includes a color photo and target skills to help students understand connections to the content that is presented in the lesson.

These papers will be provided and students will use the strategies and skills as an initial and final check in the lesson. The student will use a checklist to help them understand the process, and the teacher will use the checklist to help them understand the process.

Students will use the checklist to help them understand the process and the teacher will use the checklist to help them understand the process. The student will use the checklist to help them understand the process and the teacher will use the checklist to help them understand the process. The student will use the checklist to help them understand the process and the teacher will use the checklist to help them understand the process.

CHAPTER 10: THE MATHS

Mathematics is a subject that is often considered to be one of the most difficult subjects to learn. However, it is a subject that is essential for many careers and is a subject that can be learned by anyone who is willing to put in the effort. This chapter will provide a comprehensive overview of the mathematics that is required for the majority of careers. It will cover the basic principles of arithmetic, algebra, geometry, and trigonometry, as well as the more advanced topics of calculus and statistics. The chapter will also provide a series of worked examples and exercises to help you to understand and apply the concepts that are discussed.
